SUMMARY

Highly motivated Full-Stack Developer with a B.Sc. in Software Engineering and extensive experience in building dynamic web applications. Proficient in modern technologies including Java, React JS, Node.js, and Python, I have successfully developed and customized solutions that enhance user experience and streamline workflows. My expertise includes creating robust ERP systems, developing e-commerce platforms, and implementing real-time data management solutions leveraging Firebase.

EXPERIENCE

Web Developer | WJS Digital Innovations Ltd 07/2024 to Present

- Built a reservation system with an admin dashboard for creating time slots and managing users, utilizing RESTful APIs for seamless integration
- Integrated Firebase services for real-time data management and user authentication, enhancing cross-functional integration
- Developed a car parts e-commerce platform with 30,000+ products, focusing on performance and scalability, leveraging web services
- Worked on incorporating AI agents to enhance system automation and user interaction, aligning with software development best practices
- Worked across the full stack using technologies such as React.js, Node.js, SQL, JavaScript, and Firebase, with a focus on API management

Instructor | Teaching 05/2021 to Present

- Taught computer science and mathematics courses to academic students, providing hands-on programming and problem-solving skills
- Instructed high school students in computer science, physics, and mathematics. This experience has enhanced my communication skills and ability to collaborate across disciplines, aligning with business-critical initiatives and product execution demands

EDUCATION

B.Sc, Software Engineering | Ort Braude College 2019 to 2023

Recognized with three Dean’s Honors for academic excellence. Developed strong expertise in software engineering principles.

AWS Cloud Practitioner | Elevation 2024 to 2024

AWS Cloud and IT fundamentals training, hand-on EC2, S3, IAM, VPC, with cloud architecture, Linux, backend security, Servers.

Priority Development | In-Line College 2025 to Present

Learned to customize Priority ERP: forms, procedures, triggers, APIs, and business logic to build tailored solutions and automate workflows, with attention to details and quality engineering.

SKILLS

event management	full-stack development	JavaScript
Java	Python	React
